Head Office ERP   Sales Order Processing (SOP7)   Cloud Sync   Mobile Device and eCommerce

Step 1. Data is automatically extracted from the Head office database to the SOP.

Step 2. The Data is automatically generated by the SOP in readiness for your users' mobile device and/or Cloudfy site.

Step 3. Data is synchronised, using a 3G, 4G or Wi-Fi connection from the tablet or mobile device.

Step4. Transactions collected by the remote user or placed online with Cloudfy are synchronised via the SOP using a 3G, 4G or Wi-Fi connection.

Step 5. An admin SOP user is able to monitor, analysis, report and manage all collected transactions and remote users.
